## KATANA™ ZIRCONIA BLOCK

You often ask yourself what is more important: esthetics or mechanical properties? KATANA™ Zirconia Block resolves this dilemma. With its superb flexural strength, 763 MPa and color gradient that mimics natural teeth, it provides new solutions that cannot be delivered with lithium silicate glass (LS glass) or conventional zirconia. Use our new KATANA™ Zirconia Block with CEREC® system for strong, precise, natural-looking zirconia restorations. When used with Dentsply Sirona's CEREC® system, sintering is now faster than ever – just 18 minutes. The NEW KATANA™ Zirconia Esthetic Bridge Block (14ZL) makes it possible to fabricate a full zirconia 3-unit chairside restoration in less than an hour.

## KATANA™ AVENCIA™ BLOCK

A new type of hybrid ceramic developed by bringing together latest organic/inorganic technology and our many years innovating restorative materials. Our new type of hybrid ceramic block has great mechanical strength as well as excellent polishability, thanks to its unique and innovative manufacturing procedure. In addition, KATANA™ AVENCIA™ ensures superior gloss retention compared to other materials. Single visit dentistry at its best – just mill, polish and your restoration is complete. Available with CEREC®.
