

# PANAVIA™ Veneer LC

## THE VENEER SPECIALIST

PANAVIA™ Veneer LC is a light-cure, adhesive, resin cement with easy cleanup, long working-time, excellent color stability, high wear resistance, innovative light-curing technology, and low film-thickness.

Like our other acclaimed PANAVIA™ and CLEARFIL™ line of products, PANAVIA™ Veneer LC includes MDP, which can be bonded to tooth structure using CLEARFIL™ Universal Bond Quick or PANAVIA™ V5 Tooth Primer. The original MDP monomer in these adhesives offers outstanding bond strength to several substrates (e.g. enamel, dentin, lithium disilicate, Feldspathic ceramic, and of course, KATANA™ Zirconia).

It is possible to reduce the time and effort involved in veneer placement with a cement that supports homogeneous cement application, smooth veneer positioning, easy excess removal, and quick polishing. "PANAVIA™ Veneer LC" offers all of these features while giving the clinician all the control thanks to the nanocluster technology.
